11. Which meta tag is ignored by modern search engines? c) <meta name="keywords">

12. How do you add a smooth transform on hover? c) transition: transform 0.5s;

13. Which class makes a navbar light? a) navbar-light

14. How do you make a card image at the top? a)

- 15. Which of the following design elements should be optimized for web usage when exporting assets?** a) Images, icons, and illustrations
- 16. Which of the following is a key factor in ensuring cross-device responsiveness?** c) Implementing fluid layouts and media queries
- 17. Which of the following tools can be used to inspect typography in design files?** b) Figma, Adobe XD, or Photoshop
- 18. Which method is used to select an element by its ID in JavaScript?** d) `getElementById`
- 19. What is the purpose of the switch statement?** b) To handle multiple conditions based on a single expression
- 20. How many primitive data types are there in JavaScript?** c) 7

Short Questions (সংক্ষিপ্ত প্রশ্নোত্তর)

21. What preventive measure helps avoid repetitive strain injuries? উত্তর: কম্পিউটার কাজের সময় নিয়মিত বিরতি নেওয়া।

(Answer: Taking regular breaks during computer work.)

22. Where should a negotiator look for options when attempting to resolve a conflict? উত্তর: প্রতিষ্ঠানের ভেতর এবং বাইরে উভয় ক্ষেত্রেই।

(Answer: Both within the organization and externally.)

23. Name two logical operators in JavaScript. উত্তর: && (AND), || (OR).

(Answer: && (AND), || (OR).)

24. Why is consistency important in web design? উত্তর: এটি ইন্টারফেসকে অনুমানযোগ্য এবং ব্যবহারে সহজ করে তোলে। (এটি ব্যবহারকারীর বিশ্বাসও তৈরি করে)

(Answer: Makes the interface predictable and easy to use. (also: builds user trust))

25. How does flow in UI design affect user experience? উত্তর: এটি নিশ্চিত করে যে ব্যবহারকারীরা কন্টেন্টগুলো যৌক্তিকভাবে এবং মসৃণভাবে নেভিগেট করতে পারছেন।

(Answer: It ensures users navigate content logically and smoothly.)

26. What does the `<meta charset="UTF-8">` tag do in an HTML document? উত্তর: এটি ডকুমেন্টের ক্যারেক্টার এনকোডিং UTF-8 এ সেট করে।

(Answer: It sets the character encoding of the document to UTF-8.)

27. Create a 3-column grid layout. উত্তর: `display: grid; grid-template-columns: 1fr 1fr 1fr;`

(Answer: `display: grid; grid-template-columns: 1fr 1fr 1fr;`)

28. How do you select elements by class name? উত্তর:
`document.getElementsByClassName("className")`

(Answer: `document.getElementsByClassName("className")`)

29. If a design uses a 16px font size on desktop and a 14px font size on mobile, how would you implement this change? উত্তর: মিডিয়া কুয়েরি ব্যবহার করে:

```
body { font-size: 16px; } @media (max-width: 768px) { body {  
font-size: 14px; } }
```

(Answer: Using Media queries `body { font-size: 16px; } @media (max-width: 768px) { body { font-size: 14px; } }`)

30. Explain why image optimization is crucial for web design. উত্তর: ইমেজ অপটিমাইজেশন ছবির গুণমান নষ্ট না করেই ফাইলের আকার কমিয়ে দেয়, যার ফলে পেজ দ্রুত লোড হয়, ওয়েবসাইটের পারফরম্যান্স উন্নত হয় এবং ব্যবহারকারীরা ভালো অভিজ্ঞতা পান, বিশেষ করে ধীরগতির ইন্টারনেটযুক্ত মোবাইল ডিভাইসে।

(Answer: Image optimization reduces file sizes without sacrificing quality, resulting in faster page loading times, improved website performance, and a better user experience, particularly on mobile devices with slower internet connections.)
